What is HealthCenter®

HealthCenter® is an online Personal Health Record manager that helps individuals gather and use all of their health information. Using HealthCenter®, people can easily collect data from doctors, hospitals, and labs, add data of their own, communicate securely with providers, and use all of the information to manage to their health.

Why Use HealthCenter®?

Using HealthCenter®, you can improve your patients' health and wellness as well as increase patient engagement by:

- **Exchanging secure messages between you and your patients**
- **Providing easy access to educational health information and materials**
- **Allowing patients to request prescription drug refills online**
- **Tracking patients' health metrics over time with easy-to-understand graphs**
- **Scheduling health appointments online**
- **Auto-populating patients' health files on their health dashboard**
- **Integrating popular activity trackers and health devices to improve wellness**
- **Accessing powerful population health analytics to identify patient populations in need of medical guidance and support**

HealthCenter® is ONC HIT certified for both ambulatory and inpatient settings; certified in accordance with HHS program requirements (Meaningful Use, EHR Incentive Program); and HIPAA-compliant, meeting all NIST security and privacy requirements.

By offering HealthCenter® to your patients, you empower them to actively manage all of their health information in one safe, secure, digital location. MedicaSoft can provide a turnkey hosted solution, personalized for your practice, that is ready to roll out to all patient populations.

See **medicasoft.com/compliance** for pricing and limitations required by ONC.
